

2.3.2 ICT TOOLS

In the ever-evolving landscape of education, Information and Communication Technology (ICT) tools have become indispensable, revolutionizing the way students learn, interact, and engage with course materials. This paradigm shift is particularly evident in the field of pharmacy education, where the integration of ICT tools has brought about transformative changes. In this discourse, we explore the multifaceted impact of ICT tools on pharmacy education, delving into specific examples and their implications.

1. Virtual Laboratories and Simulation Software:

Pharmacy education traditionally involves practical laboratory work, and here is where virtual laboratories and simulation software play a pivotal role. Programs like ChemDraw Collective and Labster allow students to conduct experiments in a virtual environment, offering a risk-free space for learning and experimentation. This not only enhances safety but also provides students with the opportunity to repeat experiments until mastery is achieved.

2. ChemDraw for Molecular Visualization:

ChemDraw, a molecular drawing tool, has become a cornerstone in pharmacy education. It enables students to represent chemical structures and reactions with precision. This not only aids in better understanding of complex pharmacological concepts but also serves as a powerful communication tool in research and collaboration.

3. Digital Libraries and DELNET:

Access to a vast repository of literature is imperative for pharmacy students. Digital libraries, often accessible through platforms like DELNET, offer a rich collection of academic resources, research papers, and journals. The convenience of accessing this wealth of information from anywhere facilitates self-directed learning and in-depth exploration of pharmacy-related topics.

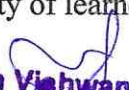

4. Pharmacology Software for Interactive Learning:

CAL PHARM Pharmacology Software is designed to make the study of pharmacology more interactive and engaging. Through visual aids, quizzes, and interactive modules, students can grasp complex pharmacological concepts with greater ease. Such software enhances the retention of information and promotes a deeper understanding of drug mechanisms and interactions.

5. Communication Tools - Zoom and Google Meet:

In the era of remote learning, communication tools like Zoom and Google Meet have become integral components of the pharmacy student's toolkit. These platforms facilitate virtual lectures, collaborative group projects, and one-on-one interactions with professors. The ability to connect with peers and educators in real-time transcends geographical boundaries, fostering a global community of learners.

6. QR Codes for Accessing Resources:

Approved by: PCI; Govt. of Maharashtra; DTE; KBC NMU Jalgaon
Morane-Gondur Bypass Road, Gondur, Dhule- 424002

The incorporation of QR codes in educational materials provides a seamless way for students to access digital resources. In the context of pharmacy education, a QR code might lead students to a digital library, of a supplementary materials, enhancing the accessibility and immediacy of learning resources.

Using Google Meet and Zoom for online lectures or meetings in preparation for the Graduate Pharmacy Aptitude Test (GPAT) examination is a great idea. Google Meet and Zoom are both popular video conferencing platforms that offers various features to facilitate online learning and collaboration Schedule.

Regular Sessions: Plan a schedule for our online lectures and study sessions using Zoom. Consistency is key for effective learning for our students.

Create Meeting Links: Set up Zoom meetings for each session and create unique meeting links. This way, you can share the links with participants, making it easy for them to join the sessions.

Share GPAT Study Materials: Use Zoom's screen sharing feature to display GPAT study materials, slides, or whiteboards during your lectures. This helps participants follow along and take notes.

Interactive Sessions: Encourage active participation by allowing participants to ask questions through Zoom's chat or audio/video features. You can also use Zoom's breakout rooms to facilitate group discussions and problem-solving exercises.

Recording Sessions: Zoom allows you to record your sessions. Recording can be helpful for students who might miss a session or want to revisit the material later for revision.

Polls and Quizzes: Use Zoom's polling feature to engage participants with questions related to GPAT topics. It can be an effective way to assess their understanding.

Security: Ensure that your Zoom meetings are secure. Use features like meeting passwords and waiting rooms to prevent unauthorized access.

Practice Mock Tests: Host mock GPAT exams using Zoom. You can share the questions on screen or distribute them via chat, and participants can answer within a time limit.

Collaborative Study Groups: Encourage participants to form study groups using Zoom. They can meet separately to discuss topics, solve problems, and prepare for the exam together.

When using projectors and screens for our students, it's important to tailor their use to the specific needs of pharmacy education. Here are some ways in which projectors and screens can be effectively used for pharmacy students

Drug Information and Database Access: Display drug information databases and resources on the screen to teach students how to access and interpret drug-related data, including drug interactions, dosages, and adverse effects.

Pharmacology Visuals: Present pharmacological concepts, mechanisms of action, and drug classifications using visual aids, diagrams, and animations. This helps students better understand complex pharmacological concepts.

Case Studies: Use the projector to discuss and analyze real-world patient cases, highlighting the role of medications, drug interactions, and treatment plans in pharmacy practice.

Patient Counseling Simulations: Project simulated patient scenarios on the screen to help students practice patient counseling, including discussing medication instructions, side effects, and compliance.

Drug Formulation and Compounding Demonstrations: Display compounding techniques, pharmaceutical calculations, and sterile compounding procedures for students to learn and practice.

Pharmacy Law and Ethics: Present pharmacy laws, regulations, and ethical guidelines on the screen, emphasizing their importance in pharmacy practice.

Clinical Guidelines: Display clinical practice guidelines, treatment protocols, and evidence-based medicine resources to teach students how to make informed decisions in patient care.

Research and Literature Review: Teach students how to conduct literature reviews and use research databases effectively by projecting the process and examples of literature searches.

Medication Safety: Use the screen to emphasize the importance of medication safety protocols, such as labeling and verification procedures, in preventing medication errors.

Drug Utilization Evaluations: Show examples of drug utilization evaluations and how to assess the appropriateness, effectiveness, and safety of medication regimens.

Pharmacy Calculations: Project pharmacy calculations, dosage conversions, and drug preparation procedures to reinforce mathematical skills required in pharmacy practice.

Pharmacy Practice Management: Discuss pharmacy business management topics, including inventory control, budgeting, and compliance, with relevant visual aids.

Online Learning and Webinars: Host or attend online pharmacy-related webinars and continuing education sessions, sharing the content with students via projection screens.

Collaborative Group Work: Use screens for group projects, collaborative research, and student presentations on topics related to pharmacy practice.

Guest Speakers and Industry Experts: Invite guest speakers from the pharmaceutical industry, regulatory agencies, or healthcare organizations to give presentations or lectures, which can be projected for student engagement.

Mock Pharmacy Simulations: Use projectors to create mock pharmacy settings, simulating dispensing, medication counseling, and patient interactions for students to practice in a controlled environment.

Pharmacy Career Pathways: Display information about various career opportunities within the field of pharmacy to help students explore their options.

3. Computer lab

A computer lab used for our students is an essential resource for their education and training. Our students rely on technology for various aspects of their coursework and professional development. Here are some key features and purposes of a computer lab designed for pharmacy students.

Access to Drug Information: Our students need access to databases and software that provide comprehensive drug information, including drug interactions, dosage calculations, and adverse effects. These resources help them learn how to safely and effectively use medications.

Instructions to Run CALpharm

**CALpharm runs only when
the pen drive is connected to computer**

1. Connect pen drive.
2. It will auto run, if not, double click on auto run icon.
3. Open the 'CALpharm2019' folder.
4. Then open 'PE Package 32' folder and run the 'setup.exe' file
(During setup select to keep the original files of your computer).
5. Go to 'CALpharm2019' folder once again.
6. Copy folders entitled 'crp' and 'Phamex' to 'C drive'.
(Don't rename the folders and keep these folders on C drive).
7. Go to C drive, open Phamex folder & create a desktop shortcut
for PharmEx.exe file.
8. Use PharmEx.exe icon on the desktop to explore PharmEx.
9. Explore other folders for Xpcology & techniques in experiments
from pendrive.

Depending on configuration of your device the programme
may need some time to run, So please have patience.....

4. DELNET Bill

Dr. Sangeeta Kaul
Director

DELNET/IM-7118/mhPRNCP/MEM/2020

Sub: DELNET Membership Renewal

Dear Mr. Khare,

I would like to inform you that the membership subscription of DELNET by your institution is due for renewal on January 14, 2021. We are enclosing herewith an invoice no. 2020/43452 dated 3.12.2020 of ₹13,570 (₹ Thirteen Thousand Five Hundred Seventy only) towards the DELNET Annual Institutional Membership Fee for the year 2021-2022 (inclusive of GST). The GSTIN of DELNET is 07AAAAD2288G1ZV. Please note that the renewal payment received will be considered from the date of expiry of membership only.

Kindly arrange to send us the payment of ₹ 13,570 through a demand draft drawn in favour of "DELNET" and it should be made payable at a "New Delhi" bank branch. Please note that the payment can also be sent electronically to the following DELNET bank account through NEFT/Netbanking.

Bank A/c Holder Name : DELNET
Bank : Central Bank of India
Address : Khan Market, Lok Nayak Bhavan
New Delhi- 110003
Account No. : 1065410992
Account Type : Saving Bank
IFS Code : CBIN0280310

Kindly inform us the bank UTR number and the date of transaction if the amount is remitted through the bank.

We would also like to request you to kindly inform us the GSTIN of your institution, if any, so that we can update the same in our accounting system.

With kind regards,

Yours sincerely,

Sangeeta Kaul
